00 · A CLEARER VIEW OF YOUR MONEY

How to use Saldoa on your computer

A practical guide to organizing income, expenses, categories and spending limits in the web version of Saldoa.

> **Open in your browser:** saldoa-app.duckdns.org. There is no desktop program to install.

Sign in or create an account

1. On the website, click **Entrar** (Sign in) or **Criar conta** (Create account).
2. For registration, enter your name, email, password and confirmation. Follow the password requirements shown and submit the form.
3. After signing in, check your categories, record a transaction and review the Dashboard.

You can use the same account on the app and website. Your records belong to your account; always check that you are signed in with the correct email.

Find each section

01 · Dashboard
Understand balances and select a month.

02 · Transactions
Record, filter and correct transactions.

03 · Categories and limits
Organize and track spending.

04 · Recurring rules and schedule
Review upcoming transactions.

05 · Export and account
Download CSV and adjust preferences.

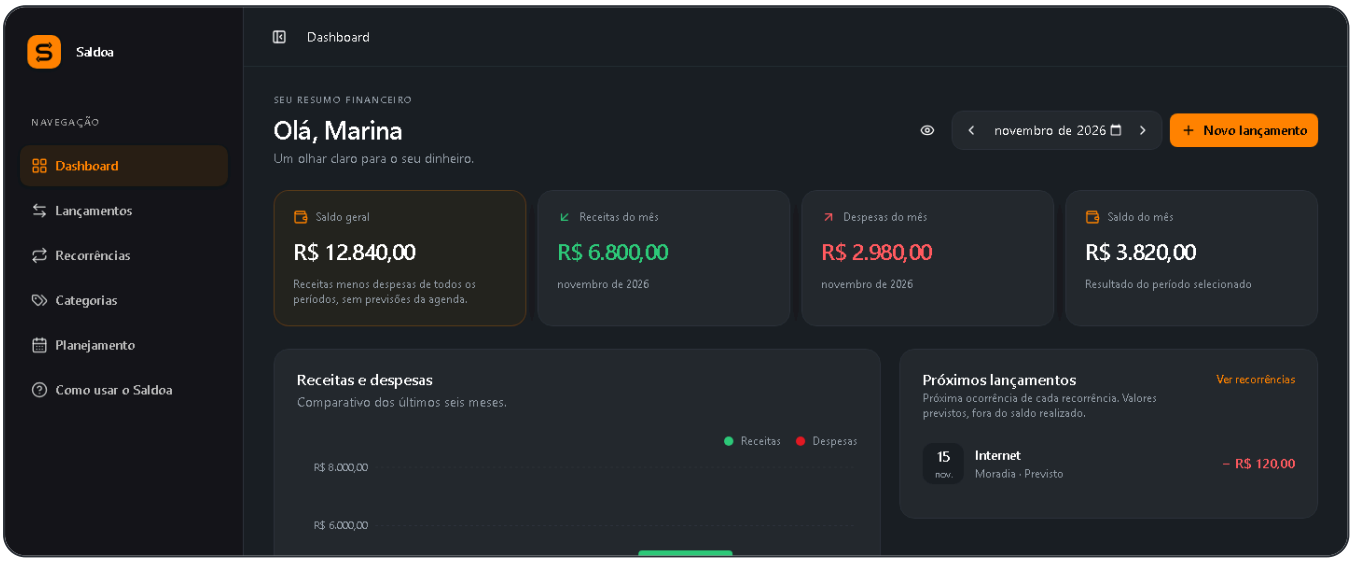

06 · Routine and questions
Find quick answers.

The website interface is in Portuguese. This guide keeps the original control names in bold so you can find them on screen. Use the sidebar to navigate; your name at the bottom left opens settings and sign-out. In narrow windows, open navigation with the menu button.

01 · TRACK YOUR MONEY

Understand your overview

The Dashboard brings together your main figures, chart and account shortcuts.

Top of the desktop Dashboard, with the sidebar, month selection and balances.

Choose the month

Use the arrows or month selector at the top. Monthly income, expenses and balance follow that period.

Overall balance

Saldo geral is recorded income minus expenses across **all periods**. It is not limited to the selected month.

Monthly balance

Saldo do mês is the difference between income and expenses in the selected period.

Read the rest of the overview

The chart compares income and expenses. Scroll down to see spending limits and recent transactions.

Próximos lançamentos shows forecasts from recurring rules. These amounts are outside the recorded balance.

On-screen privacy

The eye icon in the header hides or shows the amounts in your overview.

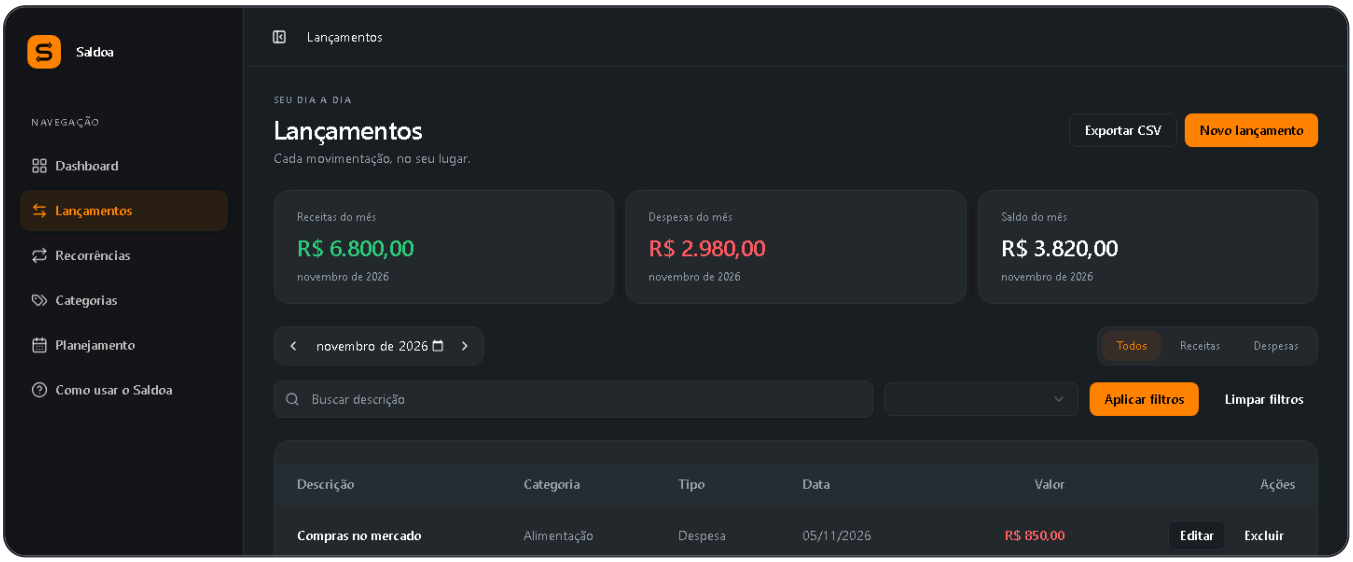

A fictional monthly example

Recorded income	R$ 3.000,00
Recorded expenses	R$ 1.200,00
Monthly balance	**R$ 1.800,00**

02 · RECORD YOUR DAY-TO-DAY FINANCES

Add income and expenses

Each transaction records an amount, description, category and date.

Desktop transactions: Novo lançamento, Exportar CSV, filters and the transaction table.

Create a transaction

1. Open **Lançamentos** → **Novo lançamento**. The Dashboard also has this shortcut.
2. Choose **Receita** (Income) or **Despesa** (Expense) and enter the amount, description, category and date.
3. Use a category of the same transaction type and check the date in **dd/mm/yyyy**.
4. Click **Adicionar lançamento**.

Example: for R$ 50,00, type 5000 in the amount field. Formatting appears while you type.

Find a record

Choose the month and combine type, category and description search. Click **Aplicar filtros** to apply them; use **Limpar filtros** to reset the query.

If there are more pages, use pagination at the bottom of the table.

Correct or delete

On the relevant row, click **Editar**, adjust the fields and save. To remove the record, choose **Excluir** and confirm.

> **Cannot find the category?** Open **Categorias** → **Nova categoria** in the sidebar. Then return to the transaction and select the new category.

Income is money coming in; an expense is money going out. Enter positive amounts and let the selected type determine how the record affects your balance.

03 · ORGANIZE YOUR SPENDING

Set limits by category

Categories organize records. Limits help you track spending in each expense category.

Desktop planning: overview, limits, schedule and the button to create a new limit.

Create your categories

In the sidebar, open **Categorias** → **Nova categoria**. Enter a name, choose **Receita** (Income) or **Despesa** (Expense), then click **Criar categoria**.

Examples: “Salary” for income; “Food” and “Housing” for expenses.

Create a spending limit

Open **Planejamento** → **Novo limite**, choose an expense category, enter the monthly amount and click **Salvar meta**.

Track spending

Review the amount spent, percentage used and amount available. A warning appears from **80%**. At **100% or more**, the limit has been reached.

Use the edit and delete icons on a limit to adjust or remove its setting.

One limit per category

An expense category can have only one limit. Deleting the limit keeps the transactions already recorded.

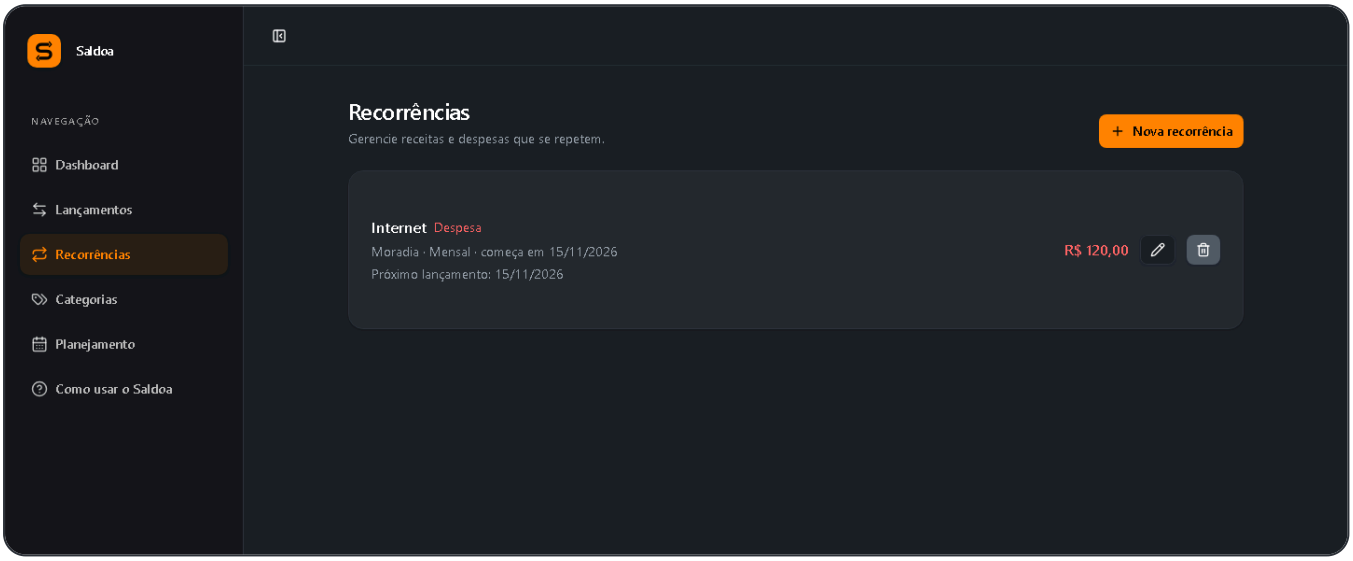

> **The limit continues in future months.** Changing the month changes the spending you view. Editing the amount changes the category setting; it does not create a value exclusive to that month.

To delete a category in use, first remove or move its associated transactions and recurring rules. The website tells you when deletion is not allowed.

04 · ORGANIZE WHAT REPEATS

Set up recurring transactions

Use a recurring rule for income or expenses that repeat, such as salary, rent and subscriptions.

Desktop recurring rules, with actions to create, edit and delete rules.

Create a rule

1. Open **Recorrências** → **Nova recorrência** in the sidebar.
2. Enter the description, amount, type and matching category.
3. Choose a frequency: daily, weekly, monthly or yearly.
4. Enter the start date, from today onward. Add an end date if needed.
5. Click **Criar recorrência**.

Review the schedule

Open **Planejamento** → **Agenda** and choose a month. The schedule shows the **next occurrence of each rule** expected in that period.

The Dashboard also shows forecasts under **Próximos lançamentos**.

Change or stop a rule

In the rules list, use the edit action to adjust the details. To stop new records, choose **Excluir** and confirm. Previously generated transactions remain in the history.

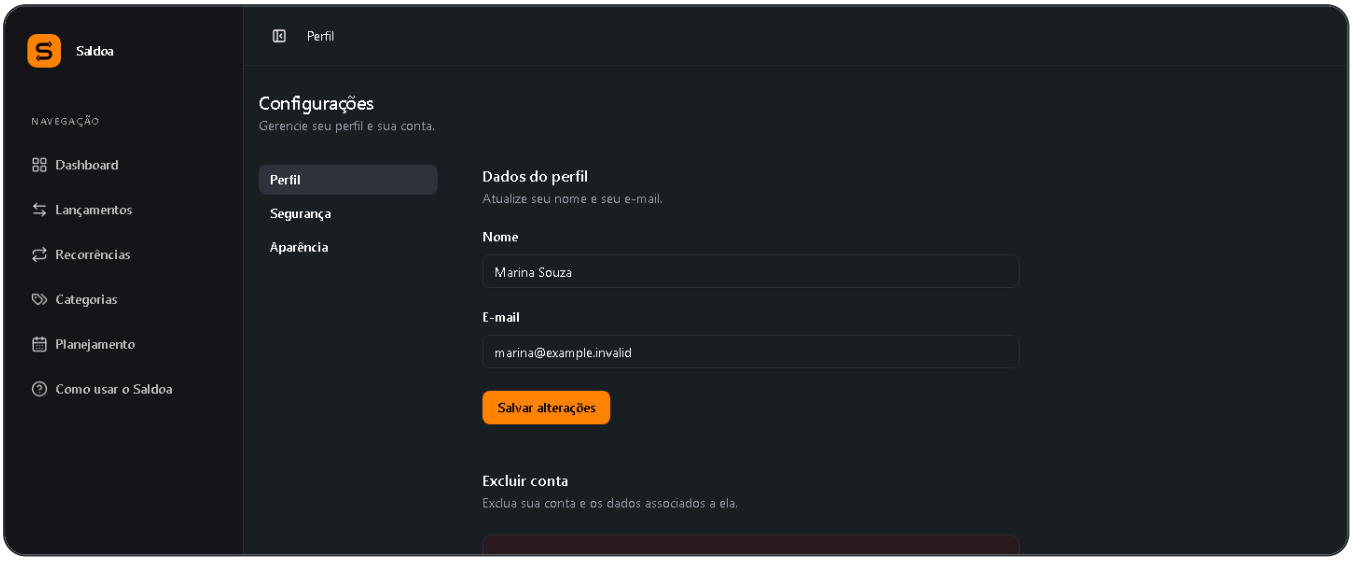

> **Forecasts and actuals are different.** A R$ 90,00 subscription can appear in the schedule before its due date. The amount enters your totals when the transaction is generated.

Saldoa records financial transactions; it does not make payments or collect money. Avoid manually adding a transaction that a recurring rule has already generated.

05 · LOOK AFTER YOUR DATA

Export and customize the website

Download your transactions and use settings to manage your profile, password and appearance.

Desktop profile settings. The account menu provides access to Perfil, Segurança and Aparência.

Download CSV

1. Open **Lançamentos**.
2. Choose the month and apply the filters you need.
3. Click **Exportar CSV**.
4. Open the file in a spreadsheet editor. If needed, choose UTF-8 and semicolon as the separator.

The export follows the applied query, including its period and filters. It does not change your Saldoa records.

Download this guide

Open **Como usar o Saldoa** in the sidebar and choose the desktop PDF in Portuguese or English.

Open settings

Click your name at the bottom left, then **Configurações**.

- **Perfil:** change your name and email.
- **Segurança:** update your password.
- **Aparência:** choose light, dark or system theme.

Save any forms you change. To sign out, open the account menu and click **Sair**.

> **Account deletion is permanent.** The option is under **Configurações → Perfil**. Read the warning and confirm only if you want to remove your account and its data.

The website interface is in Portuguese. This English guide translates the instructions and keeps the control names so you can find them on screen.

06 · KEEP THINGS SIMPLE

A simple routine

Day to day

Record what you receive and spend. Use clear descriptions and check the category, amount and date.

When reviewing the month

Review balances and limits, check the schedule and export the current query whenever needed.

Common questions

I forgot my password. How do I reset it?

On the sign-in page, click **Esqueceu sua senha?**, enter your email and follow the link you receive. Check your spam folder too. Then sign in to the website again.

My password was rejected during registration.

On the public service, use at least **12 characters**, with uppercase and lowercase letters, numbers and a symbol. Confirmation must match. Passwords found in data breaches may also be rejected; follow the message shown.

I cannot find a transaction.

Check the month, clear search and filters, and review pagination. Also check you are in the correct account. The overall balance covers all periods; the monthly balance covers only the selected one.

I cannot create a new limit.

Choose an expense category that does not have a limit yet. If all categories have one, edit an existing limit or create another expense category.

A forecast is missing from the schedule.

Check that a recurring rule exists and that its next date falls within the selected month and the rule's validity period. The schedule does not list every future occurrence of each rule.

The website is not loading.

Check your connection and try again. If your session has expired, sign in again. A temporary connection failure does not mean your records were deleted.

Desktop guide · 8 November 2026. Portuguese screenshots with fictional data. The downloaded PDF is available offline; the website requires internet access.
