YOUR MONEY, WITH MORE CLARITY

How to use Saldoa

A practical guide to recording income and expenses, tracking your balance and planning your monthly spending.

1. Install the app

Open the Android download page on your phone and download **saldoa-android-v1.1.0.apk**. Tap the file and allow installation from your browser or file manager if Android asks you to.

Direct download for ARM64 Android devices; the app is not yet on the Play Store.

2. Create your account or sign in

Tap **Create an account**. Enter your name, email, password and password confirmation. Then tap **Create my account**.

Already registered on the public website? Sign in to the app with the same email and password.

3. Start with the basics

Check your categories, record some income and an expense, and see the result on **Home**.

Sign-in screen. The images in this guide are browser previews of the app with fictional data.

Home · page 2
Balance and financial overview.

Transactions · page 3
Everyday income and expenses.

Planning · page 4
Limits and spending by category.

More · pages 5 and 6
Recurring rules, data and account.

Use Wi-Fi or mobile data. You can also access Saldoa in your browser at saldoa-app.duckdns.org.

01 · TRACK YOUR MONEY

Understand your overview

Home brings together the main figures and shortcuts in the app.

Choose the month

Use the arrows beside the month to view other periods. Monthly income, expenses and balance follow this selection.

Overall balance

The difference between all recorded income and expenses, across all periods.

Monthly balance

The difference between income and expenses for the selected month.

Income and expenses

Income is money coming in, such as your salary or extra work. **Expenses** are money going out, such as groceries and rent.

Other information

Scroll down to see the chart, upcoming transactions, spending limits and recent records.

The eye icon beside your name hides or shows the amounts in your overview.

The four tabs are at the bottom: Home, Transactions, Planning and More.

A fictional monthly example

Recorded income	R$ 3.000,00
Recorded expenses	R$ 1.200,00
Monthly balance	**R$ 1.800,00**

02 · RECORD YOUR DAY-TO-DAY FINANCES

Add income and expenses

Each transaction records a financial movement with an amount, description, category and date.

To create a transaction

1. Open **Transactions** and tap **+ New**. You can also use **New transaction** on Home.
2. Choose **Income** or **Expense**.
3. Enter a positive amount, such as **150,00**, and a description, such as “Grocery shopping”.
4. Select a category that matches the transaction type.
5. Check the date in **dd/mm/yyyy** and tap **Add transaction**.

To find a record

Choose the month using the arrows, search by description and use these filters: **All**, **Income** or **Expenses**.

If there are more results, tap **Load more**, at the bottom of the list.

To correct or delete a record

Tap the transaction to edit its fields, then tap **Save changes**.

To remove a record, tap the trash icon beside it and confirm.

Records are grouped by date. Search uses the transaction description.

> **Cannot find the category?** Go to **More** → **Categories** and create an income or expense category to match the transaction.

When entering an amount, use “150,00”, without “R$” or a thousands separator. The Income or Expense type determines whether money comes in or goes out.

03 · ORGANIZE YOUR SPENDING

Set limits by category

Categories organize your records. Limits help you track how much you have spent during the month.

Create your categories

More → Categories

Enter a name, choose **Income** or **Expense** and tap **Add category**.

Examples: “Salary” for income; “Food” and “Housing” for expenses.

Create a spending limit

1. Open **Planning**.
2. Tap **+ New limit**.
3. Choose an expense category and enter the **Monthly limit**.
4. Tap **Save budget**.

Track your spending

See the amount spent, the percentage used and how much remains available. From **80%**, the indicator shows a warning. At **100% or more**, the limit has been reached.

Use **Edit** to change the amount or **Delete** to remove the limit.

“Budget remaining” includes only categories with a spending limit.

> **The limit continues in future months.** The arrows change the month and spending you are viewing. Editing a limit changes the category setting; the amount is not exclusive to that month.

Only one limit can be set per expense category. To delete a category that is in use, first remove or move its transactions and recurring rules. Deleting a limit keeps the transactions.

04 · ORGANIZE WHAT REPEATS

Set up recurring transactions

Use a recurring rule for income or expenses that repeat, such as your salary, rent and subscription fees.

More → Recurring

How to set up a rule

1. Enter the description and amount.
2. Choose **Income** or **Expense** and the matching category.
3. Set the frequency: **Daily**, **Weekly**, **Monthly** or **Yearly**.
4. Enter a start date of today or later, in **dd/mm/yyyy**.
5. Tap **Create recurring rule**.

How to view the schedule

Open **Planning** → **Schedule** and select the month you want.

The schedule shows the **next occurrence of each recurring rule** in that period.

You can also find forecasts under **Upcoming transactions**, on Home.

Use **Manage recurring transactions** to view your saved rules.

A fictional example: a subscription

You set up a monthly expense of R$ 90,00, starting on 10/11/2026.

1. Rule
Subscription
R$ 90,00 per month

→

2. Forecast
Next date
10/11/2026

→

3. Record
The system creates the transaction on its due date.

Forecasts and actuals are different. Schedule forecasts stay outside the recorded balance. Amounts enter the totals when a transaction is generated.

To stop a recurring rule

In the rule list, tap **Delete** and confirm. The rule stops generating new records; transactions it has already created remain in your history.

A recurring rule creates financial records in Saldoa. You must check whether payment was made or received. Avoid manually recording a transaction already generated by a recurring rule.

05 · LOOK AFTER YOUR DATA

Export and customize the app

The More tab brings together categories, recurring rules, language, appearance and account options.

Choose what to export

Where to tap	What you receive
Transactions → Export	CSV data for the selected month, respecting your search and type filter. Includes results beyond those already loaded on screen.
More → My account → Export monthly CSV	Transactions for the phone's current month. To choose another month, export from the Transactions screen.
More → My account → Export all data	Your profile and financial data in JSON, a structured text format for keeping a copy of your information.

The app opens the Android sharing menu with the **text content**. Choose an app to save or send this content. To use it as a file, save the text with the extension **.csv** or **.json**, depending on the export.

CSV data can be imported into a spreadsheet. If you prefer to download a file directly, use the web version's export feature.

Language and appearance

More → Language and appearance

Select **Português** or **English**. For the theme, choose **Light**, **Dark** or **System**.

Preferences are saved on your device. Amounts remain in Brazilian reais (BRL).

Sign out of your account

More → My account

Tap **Sign out** to end access on this device.

To revoke app sessions, use **Sign out on other devices**. Confirming also signs you out of the current app session.

Delete your account

Under **More → My account → Delete account**, enter your password, tap **Delete my account** and confirm. Deletion is permanent and removes associated data. Export a copy first if you want to keep it.

If you cannot access the app, you can start the request at Delete your account on the website and follow the confirmation sent by email.

06 · KEEP THINGS SIMPLE

A simple routine

Day to day

Record what you receive and spend. Use clear descriptions and check that the category and date are correct.

When reviewing the month

Check your balance, track your limits, view the schedule and export records whenever needed.

Common questions

I forgot my password. How do I reset it?

On the sign-in screen, tap **Forgot password**. The website will open in your browser. Enter your email, open the message you receive and follow the link to create a new password. Then return to the app and sign in again. Check your spam folder too.

My password was rejected during registration.

On the public service, use at least **12 characters**, including uppercase and lowercase letters, numbers and a symbol. The confirmation must match. A password found in data breaches may also be rejected; follow the message shown in the app.

I cannot find a transaction.

Check the selected month, clear the search and choose **All**. Tap **Load more**, if available. Also check that you are signed in to the correct account.

I cannot create a new limit.

A limit requires an **expense** category that does not already have a budget. Create a category under **More** → **Categories** or edit the existing limit.

A forecast is missing from the schedule.

Check that a recurring rule exists and that its next occurrence falls within the selected month. The schedule shows the next date for each rule; it does not list all future occurrences.

The app is not loading data.

Check your connection and use **Try again**, when it appears. If your session expires, sign in again. A temporary connection failure does not mean your records have been deleted.

Guide prepared for Saldoa Android 1.1.0, based on the project's screens and rules as of 6 November 2026. Screenshots show the Portuguese interface; names and amounts are fictional. Navigation paths in this document refer to the app.
